

GET THE FACTS ABOUT

PRE EXPOSURE PROPHYLAXIS (PREP)

What is PrEP ???

PrEP (pre-exposure prophylaxis) is medicine (pills or shots) that reduces your chance of getting HIV.

PrEP is for adults and adolescents without HIV who may be exposed to HIV through sex or injection drug use.

PrEP may be an option to help protect pregnant people and their babies from getting HIV while trying to get pregnant, during pregnancy.

IS PREP RIGHT FOR YOU?

PrEP can help protect you if you DON'T have HIV and ANY of the following apply to you.

You have had anal or vaginal sex in the past 6 months and

- **have a sexual partner with HIV (especially if the partner has an unknown or detectable viral load),**
- **have not consistently used a condom, or**
- **have been diagnosed with an STD in the past 6 months.**

You inject drugs and

- **have an injection partner with HIV, or**
- **share needles, syringes, or other drug injection equipment (for example, cookers).**

You have been prescribed PEP (post-exposure prophylaxis) and

- **report continued risk behavior, or**
- **have used multiple courses of PEP.**
